

Java Script Exercises Answer

1, The first line waits 2000ms to call the function booyah, but the second one calls it immediately.

2, They will both have the right answer which is – 6

3, Function booyah1() { setTimeout(booyah1 , 2000)

 Alert(“Booyah”);

}

Function booyah2() { setTimeout(booyah2, 2000)

 Alert(“Booyah”);

}

4, Unobtrusive design means separating the content(HTML), the Style(CSS) and behavior(JavaScript) which makes our codes easy to read, maintainable and efficient.
